

EAA Chapter 1099 Seminar and Pancake Breakfast

When taken together, takeoffs and landings do not make up a large percentage of the total flight time, but combined they are the most accident prone of any regime of flight. Between the two – takeoffs and landings – the landings are the most hazardous. In this seminar we'll look at the leading causes of landing accidents by reviewing case studies, and recommend techniques to make better landings. Click on the link below and register TODAY.

Directions: The seminar will be in the conference room inside the terminal.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
